SUBJECT INDEX

Alkaline metals
hydridoaluminates of alkaline metals, 209
Alloys
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213

Cerium
phase relationships and phase transitions in the homogeneity range of pure CeH_2–CeH_3, 57
structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Ce, Er, 133
Cobalt
preparation, structure and properties of Mg_2CoH_5, 211
Copper
hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride, 261
Crystal structure
crystal structure and volume effects in the hydrides of d metals, 171
hydride phase composition and crystal structure in Zr_2PdH_x, 197

Deuterium
location of deuterium in $YD_{0.176}$ at 573 K, 153
redistribution of deuterium atoms in α-$VD_{0.3}$ single crystal under stresses, 47
Diffusion
diffusion of hydrogen and deuterium in yttrium, 358
diffusion of hydrogen in niobium under hydrostatic high pressure, 305
diffusion of hydrogen in transition metals, 358
hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride, 261
hydrogen diffusion in amorphous Pd_xSi_{1-x} studied by quasielastic neutron scattering, 355
hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies, 251
low-temperature diffusion of hydrogen isotopes in tantalum, 243
Mössbauer study of diffusion and lattice distortions in the hydrides and deuterides of niobium, 271
nuclear magnetic resonance (NMR) studies of hydrogen diffusion in Zr_2Ni hydrides, 297
phase characterization and hydrogen diffusion study in the Mg–Ni–H system, 317
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213
tracer diffusion coefficients of hydrogen at high concentration in b.c.c. host metal lattices, 223
Dilute metal–hydrogen systems
the quantum nature of dilute metal–hydrogen systems, 355

Electric field gradients
electric field gradients in different niobium hydride phases, 145
Electronic properties
structural and electronic properties of implanted metal hydrides, 1
Erbium
structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Ce, Er, 133

Hafnium
localization of hydrogen (deuterium) in Hf_2FeD_x (x = 0 - 5), 187
Holmium
structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds, 207
Hydridoaluminates
hydridoaluminates of alkaline metals, 209
Hydrogen absorption
hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride, 261

© Elsevier Sequoia/Printed in The Netherlands

hydrogen absorption in some compounds of $MoSi_2$-type structure, 115
Hydrogen pairing
NMR search for evidence of hydrogen pairing in h.c.p. yttrium, 31

Inelastic neutron scattering
recent developments in inelastic neutron scattering measurements on metal hydrides, 358
Inelastic scattering
neutron powder diffraction and inelastic scattering study of the structures of Zr_2Pd, $Zr_2PdD_{1.70}$ and $Zr_2Pd_{1.96}$ 77
Iron
hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies, 251
localization of hydrogen (deuterium) in Hf_2FeD_x (x = 0 - 5), 187
orthorhombic structure of γ-$TiFeD_2$, 39
structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds, 207

Lanthanum
accommodation of strain and particle size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloy, 105
hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride, 261
localization of hydrogen (deuterium) in α-$LaNi_5H_x$ (x = 0.1 and 0.4), 181
new hydride phase of $LaNi_5H_3$, 159
new study of the structure of $LaNi_5$-$D_{6.7}$ using a modified Rietveld method for the refinement of neutron powder diffraction data, 65
Laves phase
structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds, 207

Magnesium
low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction, 208
phase characterization and hydrogen diffraction study in the Mg–Ni–H system, 317
preparation, structure and properties of Mg_2CoH_5, 211
studies of the Mg_2Ni–Mg_2NiH_4 system, 210
Magnetic properties
structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Ce, Er, 133
Magnetism
structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds, 207
Molybdenum
hydrogen absorption in some compounds of $MoSi_2$-type structure, 115
X-ray diffraction study of hydride precipitation in the systems, Nb–H and Nb–5at.%Mo–H, 123
Monte Carlo calculation
Monte Carlo calculation of the incoherent quasi-elastic scattering function for hydrogen in b.c.c. metals, 229
Mössbauer spectroscopy
hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies, 251
Mössbauer study of diffusion and lattice distortions in the hydrides and deuterides of niobium, 271
Muon
structure of the hydrogen arrangement around a positive muon in α'-PdH_x, 237
Muon spin relaxation
a comparative muon spin relaxation (μSR) study of titanium and yttrium dihydrides, 327

Neutron diffraction
low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction, 208
new study of the structure of $LaNi_5$-$D_{6.7}$ using a modified Rietveld method for the refinement of neutron powder diffraction data, 65
neutron diffraction study of ZrD_2 up to the pressure of 10GPa, 165
neutron powder diffraction and inelastic scattering study of the structures of Zr_2Pd, $Zr_2PdD_{1.70}$ and $Zr_2Pd_{1.96}$, 77
Nickel
accommodation of strain and particle

size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloys, 105
hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies, 251
localization of hydrogen (deuterium) in α-$LaNi_5H_x$ (x = 0.1 and 0.4), 181
low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction, 208
new hydride phase of $LaNi_5H_3$, 159
new study of the structure of $LaNi_5$-$D_{6.7}$ using a modified Rietveld method for the refinement of neutron powder diffraction data, 65
nuclear magnetic resonance (NMR) studies of hydrogen diffusion in Zr_2Ni hydrides, 297
phase characterization and hydrogen diffusion study in the Mg–Ni–H system, 317
studies of the Mg_2Ni–Mg_2NiH_4 system, 210
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213

Niobium
diffusion of hydrogen in niobium under hydrostatic high pressure, 305
electric field gradients in different niobium hydride phases, 145
Mössbauer study of diffusion and lattice distortions in the hydrides and deuterides of niobium, 271
tunnelling states of hydrogen in normal and superconducting niobium, 357
X-ray diffraction study of hydride precipitation in the systems, Nb–H and Nb–5at.%Mo–H, 123

Nuclear magnetic resonance
hydrogen absorption by $LaCu_5$ and nuclear magnetic resonance (NMR) studies of hydrogen diffusion in β-$LaCu_5$ hydride, 261
NMR search for evidence of hydrogen pairing in h.c.p. yttrium, 31
nuclear magnetic resonance (NMR) studies of hydrogen diffusion in Zr_2Ni hydrides, 297
nuclear magnetic resonance (NMR) studies of single-crystal metal–hydrogen systems, 345

Nuclear magnetic resonance relaxation
NMR rotating frame relaxation in the rigid lattice regime by spin–spin interactions, 357

Nuclear spin relaxation
nuclear spin relaxation due to dipolar interactions in hexagonal crystals, 335

Palladium
formation of hydrides in small particles of palladium supported in Y-zeolite, 311
hydride phase composition and crystal structure in Zr_2PdH_x, 197
hydrogen diffusion in amorphous Pd_xSi_{1-x} studied by quasielastic neutron scattering, 355
neutron powder diffraction and inelastic scattering study of the structures of Zr_2Pd, $Zr_2PdD_{1.70}$ and $Zr_2Pd_{1.96}$, 77
structure of the hydrogen arrangement around a positive muon in α'-PdH_x, 237

Particle size broadening
the accommodation of strain and particle size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloy, 105

Permanent magnets
from permanent magnets to rechargeable hydride electrodes, 13

Perturbed angular correlation spectroscopy
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213

Phase characterization
phase characterization and hydrogen diffusion study in the Mg–Ni–H system, 317

Phase composition
hydride phase composition and crystal structure in Zr_2PdH_x, 197

Phase transitions
phase relationships and phase transitions in the homogeneity range of pure CeH_2–CeH_3, 57
phase transformations in the Ti–H system at high pressures, 93

Preparation
preparation, structure and properties of Mg_2CoH_5, 211

Properties
preparation, structure and properties of Mg_2CoH_5, 211

Quasi-elastic neutron scattering
hydrogen diffusion in amorphous Pd_xSi_{1-x} studied by quasi-elastic neutron scattering, 355
Quasi-elastic scattering
Monte Carlo calculation of the incoherent quasi-elastic scattering function for hydrogen in b.c.c. metals, 229

Rechargeable hydride electrodes
from permanent magnets to rechargeable hydride electrodes, 13
Rietveld refinement
new study of the structure of $LaNi_5$-$D_{6.7}$ using a modified Rietveld method for the refinement of neutron powder diffraction data, 65
accommodation of strain and particle size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloy, 105

Silicon
hydrogen diffusion in amorphous Pd_xSi_{1-x} studied by quasi-elastic neutron scattering, 355
Solid solution
long-range and short-range ordering of hydrogen or deuterium atoms in solid solution in yttrium, 287
Strain
accommodation of strain and particle size broadening in Rietveld refinement; its application to de-deuterided $LaNi_5$ alloy, 105
Structural properties
structural and electronic properties of implanted metal hydrides, 1
structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Ce, Er, 133
Structure
low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction, 208
preparation, structure and properties of Mg_2CoH_5, 211
structure and magnetism of $Ho_6Fe_{23}D_x$ and Laves phase compounds, 207
Sublattice melting
dynamical evidence of hydrogen sublattice melting in metal–hydrogen systems, 279
Superconduction
tunnelling states of hydrogen in normal and superconducting niobium, 357

Tantalum
low-termperature diffusion of hydrogen isotopes in tantalum, 243
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213
Titanium
comparative muon spin relaxation (μSR) study of titanium and yttrium dihydrides, 329
hydrogen diffusion in $(Fe_{1-y}Ni_y)Ti$ hydride using Mössbauer studies, 251
orthorhombic structure of γ-$TiFeD_2$, 39
phase transformations in the Ti–H system at high pressures, 93
Transition metals
diffusion of hydrogen in transition metals, 358
Tunnelling states
tunnelling states of hydrogen in normal and superconducting niobium, 357

Vanadium
redistribution of deuterium atoms in α-$VD_{0.3}$ single crystal under stresses, 47
Volume effects
crystal structure and volume effects in the hydrides of d metals, 171

X-ray diffraction
low temperature structure of Mg_2NiD_4: a combined study of high resolution X-ray and neutron diffraction, 208
X-ray diffraction study of hydride precipitation in the systems, Nb–H and Nb–5at.%Mo–H, 123

Yttrium
comparative muon spin relaxation (μSR) study of titanium and yttrium dihydrides, 327
diffusion of hydrogen and deuterium in yttrium, 358
location of deuterium in $YD_{0.176}$ at 573 K, 153
long-range and short-range ordering of hydrogen or deuterium atoms in solid solution in yttrium, 287

NMR search for evidence of hydrogen pairing in h.c.p. yttrium, 31
structural and magnetic properties of $RE_2Fe_{14}BH(D)_x$; RE ≡ Y, Ce, Er, 133
Y-zeolite
formation of hydrides in small particles of palladium supported in y-zeolite, 312

Zirconium
hydride phase composition and crystal structure in Zr_2PdH_x, 197
neutron diffraction study of ZrD_2 up to the pressure of 10GPa, 165
neutron powder diffraction and inelastic scattering study of the structures of Zr_2Pd, $Zr_2PdD_{1.70}$ and $Zr_2Pd_{1.96}$, 77
nuclear magnetic resonance (NMR) studies of hydrogen diffusion in Zr_2Ni hydrides, 297
study of hydrogen diffusion in Zr–Ni alloys by ^{181}Ta perturbed angular correlation spectroscopy, 213
